LB 305A

SENATOR CHAMBERS: ...than the way they act when I'm talking about the interests of black children. The reason I say "I", because were I not here there would be no voice for black children. And even while I'm here there is no responsive ear. So I'm not trying to persuade you to do anything because I know that it's futile, I know that it's hopeless. Even when we get to be adults, you know how we get insulted if we happen to be a writer and we write about the experiences that we've had that we're familiar with? They say, don't...don't write about black people; write about people. That's what black writers hear. And what that means is, don't write about black people; write about white people. Do you think if an author in China was writing about the life of peasants in the provinces of
